On an Android this is what the page should look like when you open www.caldwell.edu/cougarnet

If your flavor of Android doesn't let you download and then press the JoinNow button you can go to the Playstore and get the software from there.

SecureW2 JoinNow is the software that you want to install

Rate this app

Once it's installed you will open it

Once it opens you will see this page

You want to configure and connect

On the Access this device's location page it is up to you what you want to select

The next screen you will be prompted to put in your NetID/Username and password and then click continue
